React Native Developer

Personal Project

📅 11/2022 - Present   📍 Madrid, Spain
🔗 https://apps.apple.com/app/trident-party-game/id6445924483

Created an app by myself for the App Store and Google Play Store. The app consists of a party game to play with you friends. It was developed in React Native using expo.

Software Developer

John Deere

📅 09/2021 - 02/2023   📍 Madrid, Spain

Employed as an Intern at John Deere in charge of the following roles:

- Main developer in charge of a team for developing an application using machine learning with python in order to automate the process of creating and updating orders received from customers to SAP
- Coordinating customers orders
- Stock and production control
- Also developed a webpage in React Js that automatically calculates the future planning of stock production to be able to determine if the factory has the necessary man power to fulfill the production requirements

Software Developer

UC3M & Airbus

📅 03/2021 - Present   📍 Madrid, Spain

I was part of the investigation group between my university and AIRBUS in charge of developing a new software to optimize the assembly times of the airplane's manufacturing. As of now the application has been finished and its being used in the Airbus factories.

- I was the lead programmer in charge of developing the PC application to fulfill this goal, the app was coded in React Js with Python (Flask) for the backend

Software Developer

Ubii Pagos

📅 06/2020 - 08/2020   📍 Caracas, Venezuela

The Ubiii Pagos company is a company created in Venezuela that was the one that implemented delivery services and also a product store online (service similar to Amazon)

- I was in the programming team of the back-end of the website of Ubii market and also the operation of the Ubii GO app in the which I did numerous programs and jobs in Python and SQL for the management of the company's databases
